Helix

Bag the bus. Forget begging for rides. Lose that gas-guzzling dented dinosaur dripping oil in the driveway. On a Honda scooter every day is independence day. And with three models, there's bound to be one that's perfect for you.

Take our top-of-the-line Helix®—the finest scooter ever built. Its roomy seating and 244cc liquid-cooled four-stroke engine make it big enough to carry you and a passenger with ease. The lockable rear

compartment can hold a briefcase or a locker full of gym clothes. And it's even got a front disc brake.

Our Elite® 80 is light, quiet, and the perfect urban runabout. Like the Helix, it features a fuel gauge, passenger accommodations, and an automatic choke.

Our Elite 50 SR offers a unique underseat storage compartment that will hold a full semester's worth of textbooks or your helmet when you park. And with its 49cc two-

Elite 80

stroke engine, a dollar's worth of gas will probably last you a week.

No matter which Honda scooter you choose, you couldn't have made a more friendly choice. They all start with the push of a button. They feature automatic transmissions so you don't have to shift, ever. Electronic ignitions make them about as maintenance-free as a hammer. They let you laugh at high gas prices. And you'll probably never have to hunt for a parking space again.

Elite 50 SR

And when you choose a Helix, Elite 80 or Elite 50 SR, you can become a member of the Honda Rider's Club of America (just call 1-800-847-4722 for information). If you qualify,* you can also finance your scooter through the American Honda Finance Corporation. And you can extend virtually all of your scooter's one-year, transferable warranty¹ up to three years through the HondaCare® Protection Plan. Ask your Honda dealer for details on these programs.

WHAT'S IN A NAME For more than a generation, people have come to associate one name more than any other with life on two wheels: Honda.

From the beginning, Honda has established a tradition of building the world's finest motorcycles, and that's a tradition we've carried into our line of scooters as well.

Year after year, we build performance, innovation, quality and value into all our scooters—qualities rare in themselves, and almost impossible to find together.

Scooter or motorcycle, though, Honda keeps showing the rest of the world how to do it right. Today, because of

Honda, it's hard to buy a bad two-wheeler. But it's also easy to find a great one.

Just look for the Honda name. When you find it, you'll be looking at the most influential company in the scooter industry today—and the most important name in its future.

BE A RESPONSIBLE RIDER Riding a scooter is an exercise in responsibility—to yourself, to others, and to the environment. So always wear a helmet, eye protection, and protective clothing whenever you ride. Never ride under the influence of drugs or alcohol. Read your owner's manual,

and inspect your scooter before riding. See your local Honda Scooter Dealer and view the special scooter video "Street Wise—An Introduction to Scooter Riding," and ask him about Motorcycle Safety Foundation rider training through the Honda Rider's Club of America. You can also call the MSF directly at 1-800-447-4700 for the location of a training course near you.

Always obey local laws, and make sure you have a proper license. Use common sense, and respect the rights of others when you ride.

Specifications and availability subject to change without notice. *Financing available on approved credit. ¹See your Honda Dealer for complete details.
